Please note that the eligibility criteria specified herein are the basic criteria for applying for the post. Candidates must necessarily produce the relevant documents pertaining to category, nationality, age, educational qualifications, work experience etc. in original along with a photocopy thereof in support of their identity and eligibility as indicated in the online application form at the time of interview and/or any subsequent stage of the recruitment process as required by the Bank. Please note that no change of category will be permitted at any stage after registration of the online application and the result will be processed considering the category which has been indicated in the online application, subject to guidelines of the Government of India in this regard. Merely applying for the said post/ appearing for and being shortlisted in the Online examination and/or in the subsequent GD/interview and/ subsequent processes does not imply that a candidate will necessarily be offered employment in the Bank. No request for considering the candidature under any category other than in which applied will be entertained.

Note:

- All the educational qualifications mentioned should be from a recognized University/ Institute/ Board recognized by Govt. of India/ approved by Govt. Regulatory Bodies. **Proper document from Board/ University / Regulatory Body has to be submitted at the time of application / interview / as and when called for by the Bank.** The date of passing the examination which is reckoned for eligibility will be the date of passing, appearing on the mark-sheet/ provisional certificate, issued by the University/Institute.
In case the result of a particular examination is posted on the website of the University/ Institute and web based certificate is issued then a certificate **in original** issued by the appropriate authority of the University/ Institute indicating the date of passing properly mentioned thereon will be reckoned for verification and for further process.
- Candidates should indicate the percentage obtained in Graduation/Post Graduation calculated to the nearest two decimals in the online application. Where CGPA/ OGPA is awarded, the same should be converted into percentage and indicate the same in online application. If called for interview, the candidate will have to produce a certificate issued by the appropriate authority inter alia stating the norms of the University regarding conversion of grade into percentage and the percentage of marks scored by the candidate in terms of norms.
- Calculation of Percentage:** The percentage of marks, unless mentioned by the University/ Board, shall be arrived at, by dividing the total marks obtained by the candidate in all the subjects in all semester(s)/ year(s) by aggregate maximum marks in all the subjects irrespective of honours/ optional/ additional optional subject, if any, multiplied by 100. This will be applicable for those Universities also where class/ grade is decided on the basis of Honours marks only.

The fraction of percentage so arrived will be ignored i.e. 59.99% will be treated as less than 60% and 54.99% will be treated as less than 55%.

Experience in establishing Data Governance Process and Procedures

Name of Position - ETL Developers

Participates in ETL Design of new or changing mappings and workflows with the team and prepares technical specifications.

Creates ETL Mappings, Mapplets, Workflows, Worklets, Data Transformation rules using Informatica BDM DEI Edition and prepare corresponding documentation around it

Designs and builds integrations supporting standard data warehousing objects (type-2 dimensions, aggregations, star schema, etc.).

Expert in designing workflows with Python, Spark or other scripting languages.

Performs source system analysis as required.

Works with DBAs and Data Architects to plan and implement appropriate data partitioning strategy in Data Lake/ Lake House.

Implements versioning of the ETL repository and supporting code as necessary.

Develops stored procedures, database triggers and SQL queries where needed.

Implements best practices and tunes SQL code for optimization.

Works with XML's, XML parser, Java and HTTP transformation within Informatica BDM DEI

Understand Logical and Physical data modeling best practices and techniques.

Experience in establishing Data Governance Process and Procedures.

Name of Position - Senior AI Engineer (AI/GenAI/NLP/ML)

Design and develop AI-based applications and systems that improve performance and efficiency.

Develop and Maintain AI strategies.
Implement AI solutions that integrate with existing business systems to enhance functionality and user interaction.
End to End AI Model development.
Develop machine learning models and AI solutions.
Collaborate with cross-functional teams to identify business requirements and develop solutions that meet those needs.
Ensure the quality and accuracy of AI models by testing and validating.
Work on bug fixing and improving application performance.
Ensure the performance, quality, and responsiveness of applications/ models.
Work closely on the deadlines of the project.
Collaborate with data scientists and other engineers to integrate AI with existing systems.
Stay updated with the latest advancements in AI/ML technologies and contribute to the development and improvement of AI frameworks and libraries.
Experience in using container orchestration platforms such as Kubernetes to deploy and manage machine learning models in production environments.
Hands-on experience in developing and deploying large language models (LLMs) in production environments, with a good understanding of distributed systems, microservice architecture, and REST APIs.
Name of Position - AI Engineer (AI/GenAI/NLP/ML)
Design and develop AI-based banking applications and products
End to End AI Model development and Deployment
Collaborate with cross-functional teams to identify business requirements and develop solutions that meet those needs.
Ensure the quality and accuracy of AI models by testing and validating
Work on bug fixing and improving application performance
Ensure the performance, quality, and responsiveness of applications/ models

Name of Position - Senior Developer- Full Stack Java
Design and build Banking/Financial applications using Java technology.
Work with outside data sources and APIs.
Unit-test code for robustness, including edge cases, usability, and general reliability.
Develop the front-end architecture.
Design UI layout.
Develop back-end framework.
Continuously discover, evaluate, and implement new technologies to maximize development efficiency.
Create databases to work in conjunction with the application.
Work on bug fixing and improving application performance.
Ensure the performance, quality, and responsiveness of applications.
Work closely on the deadlines of the project.
Coordinate with various teams to ensure all development tasks meet quality criteria.
Keep raising the bar and standards of all the quality processes with every project.
Collaborate with cross-functional teams to define, design, and finalize new features.

Name of Position - Senior Finacle Developer
Designing, developing and maintaining Software using the Finacle platform.
To write codes, testing and debug the software.
Understand the Business requirement and do the development to meet the organisational need.
Provide technical support and trouble shoot issues related to finacle platform.
To work on various Banking Modules, developing and customising scripts and batch jobs.
Lead the team of developers to complete the development activities in time.

Name of Position - Senior API Developer
Design, develop, and maintain scalable and secure APIs.
Integrate APIs with various in-house and third-party systems and applications.
Implement authentication and authorization mechanisms.
Migration of Legacy Services to modern API architecture.
Collaborate with cross-functional teams, including front-end developers and designers, to define and ship new features.
Optimize API performance and scalability to ensure high availability and responsiveness.
Participate in code reviews and ensure code quality and adherence to best practices.
Contribute to the development of unit tests and documentation for APIs.

Contribute to the development of unit tests and documentation for APIs.
Name of Position - Network Administrator
Maintain network devices and associated hardware, software, services, and settings.

Recommend, test, and implement system and security upgrades.
Consistently monitor and troubleshoot network stability and performance.
Create, adjust, and maintain network user settings and permissions.
Write technical support documentation for network systems and applications.
Design and implement network architectures as per bank's operational requirements
Troubleshoot problems with network devices and perform updates as per security norms.
Name of Position - Server Administrator (Linux & Unix)
perform server administration tasks (ex: user/group, security permissions, group policies, print services); research event-log warnings and errors; and monitor resources to ensure that systems architecture components work together seamlessly
Monitor data-center health using existing management tools and respond to hardware issues as they arise; help build, test, and maintain new servers when needed.
Maintain internal infrastructure requirements, including laptop and desktop computers, servers, routers, switches, firewalls, printers, phones, security updates, support internet, intranet, LANs, WANs, and network segments
Assist the help desk and other teams with troubleshooting to identify root cause, and provide technical support when needed
Perform routine and scheduled audits of all systems, including backups.
Name of Position - Senior Database Administrator (Oracle)
Design, install, configure and maintain database systems, including monitoring, tuning and troubleshooting issues.
Execute disaster recovery plans and procedures to ensure database availability during system outages or dysfunction.
Able to leads and mentors junior DBAs, coordinates with other IT teams, and communicates with stakeholders and clients.
To create and modifying database schemas, tables, views, indexes, triggers, stored procedures, functions, and other objects.
Designs and implements data models, data dictionaries, data standards, and data quality rules.
Should have knowledge and expertise in uses of at least one tools and languages, such as SQL, PL/SQL, Oracle, MySQL, PostgreSQL, MongoDB, and NoSQL, to develop and manage databases.
To implements and enforces database security policies, roles, permissions, encryption, auditing, and logging and performs regular backups and restores of the databases.
Manage and monitor disk space, database space, CPU, memory and cache, user connections. Work with complex ETL architecture that is fully dynamic to integrate all clients.
Expertise in database performance tuning and optimization techniques.
Knowledge of high availability structures and configuration, backup strategies, disaster recovery plans, and tools (e.g RMAN for oracle, RAC for oracle)
Understanding of database security protocols, including encryption, access controls, and access compliance regulations (e.g.,GDPR, PCI DSS)
Familiarity with cloud based database solutions (e.g., AWS RDS, Azure SQL DB) for modern database.
Strong analytical skills for diagnosing and resolving database issues promptly.
Name of Position - Database Administrator
To Develop and maintain database documentation, including data standards, procedures and definitions for data elements and tables in the company.
To Identify and implement database requirements for new or existing applications by working collaboratively with other teams.
To Optimise database performance and efficiency by evaluating and recommending new database technologies.
TO Support users and developers by resolving data-related technical issues and troubleshooting queries by guiding them with best practices.
To Execute regular database maintenance tasks, including database defragmentation, backups, archival and database replication.
Commitment to staying current with emerging technologies and best practices in database management.
To perform end to end automation designing for databases
To execute Database upgrade and integration of database monitoring and performance metrics in tools
To integrate and implement data replication rools for downstream systems.
To implement database security parameters and implementation of database encryption methodologies.
Name of Position - Senior Storage Administrator & Backup
Monitors and remediate NAS & SAN device/ application (Access, Performance, events) alert to identify/potential incident.
Provide storage provisioning for NAS/CAS/SAN systems.
Provide level three DAS, SAN, NAS configuration and administering support and expertise as it relates to the storage environment as needed.
Implement, maintain, monitor performance tuning and upgrade network attached storage (NAS) environment.
Storage Array/NAS performance tuning.
Design and implement a comprehensive backup strategy that meets the bank's operational needs and regulatory requirements.
Develop and maintain disaster recovery plans that detail the steps for data restoration in case of a failure or data loss.
Prepare for audits by maintaining thorough documentation of backup processes and procedures
To Generate reports on backup status, successes, failures, and trends for management review
Requires expertise with the design, configuration, and administration tuning optimisation and trouble shooting for NFS/CIFS protocol on net app and EMC Lsion storage array.

- Understand and trouble shoot the SMB, NFS, and CIFS shares network protocols.
- Play a key role in business continuity planning and DR strategy, ensuring our design are considered by using NetApp SnapMirror and snapshot plus Lsilon SyncIQ and SnapshotIQ Technology.
- Perform change management and incident management for enterprise storage system.
- Develop an understanding of project engagement process.
- Able to communicate and monitor the team.

Name of Position - Postgress Adminstrator

- To create Database Schemas and table, configure indexes, and choose the right version of postgres.
- To design the database as per its scalability and maintainability.
- Install, configure, and maintain PostgreSQL databases. Manage and optimize database performance by monitoring system resources, performing SQL tuning, and managing tablespaces.
- Implement and manage database backup and recovery strategies and setting up archiving. Perform Point-In-Time Recovery (PITR) to ensure data integrity.
- Configure and maintain high availability and replication setups, including hot standby and streaming replication for master-slave and disaster recovery nodes. Handle replication monitoring and configuration to ensure zero data loss.
- Perform database upgrades/patching and migrations, including cross-platform migrations to PostgreSQL. Create new clusters and upgrade existing clusters to new PostgreSQL servers.
- Manage database security by creating and managing database users, roles, and permissions. Implement Role-Based Access Control (RBAC) and ensure compliance with database hardening practices and data encryption.
- Write and maintain scripts for database automation and management tasks.
- Monitor database health and performance. Perform regular health checks and respond proactively to issues.
- Collaborate with development teams to design and optimize database schemas, indexes, and queries. Provide best practice guidance and resolve production data issues.
- Maintain comprehensive documentation for database configurations, procedures, and processes.

Department - EDMO

Name of Position - Senior Manager - Data Scientist

- Performing exploratory data analysis (EDA) to understand the data's structure and characteristics.
- Developing machine learning models to make predictions or classifications based on the data.
- Selecting appropriate algorithms and techniques for specific problems.
- Training, validating, and testing models to ensure they perform well.
- Creating visualizations to communicate findings clearly and effectively to stakeholders.
- Using tools like Tableau, Qlik or Power BI to create charts, graphs, and dashboards.
- Presenting complex data in a user-friendly manner.
- Applying statistical techniques to analyse data and draw meaningful conclusions.
- Ensuring the statistical validity of the results.
- Translating business problems into data-driven solutions.
- Fine-tuning algorithms and models to improve their performance.
- Conducting feature engineering to enhance model accuracy.
- Implementing cross-validation and other techniques to prevent over fitting.
- Writing efficient and maintainable code in languages such as Python, R, or SQL.
- Developing and maintaining data pipelines and workflows.
- Updating models as new data becomes available or as business needs change.
- Troubleshooting and resolving issues related to data quality or model performance.

Establish and enforce data governance policies and standards.
 Ensure data integrity, accuracy, and security across all data science activities.
 Promote a data-driven culture within the organization.

Name of Position - Chief Manager - Data Scientist

Analysing large datasets to identify trends, patterns, and insights.
 Using statistical methods to validate findings and ensure they are reliable.
 Performing exploratory data analysis (EDA) to understand the data's structure and characteristics.
 Developing machine learning models to make predictions or classifications based on the data.
 Selecting appropriate algorithms and techniques for specific problems.

 Applying statistical techniques to analyse data and draw meaningful conclusions.
 Conducting hypothesis testing and regression analysis.
 Ensuring the statistical validity of the results.
 Working with business leaders, analysts, and other stakeholders to understand their needs and requirements.
 Translating business problems into data-driven solutions.
 Communicating findings and recommendations to non-technical stakeholders.
 Fine-tuning algorithms and models to improve their performance.
 Conducting feature engineering to enhance model accuracy.
 Implementing cross-validation and other techniques to prevent over fitting.
 Writing efficient and maintainable code in languages such as Python, R, or SQL.
 Developing and maintaining data pipelines and workflows.
 Monitoring the performance of deployed models to ensure that they continue to perform well over time.
 Updating models as new data becomes available or as business needs change.
 Troubleshooting and resolving issues related to data quality or model performance.
 Establish and enforce data governance policies and standards.
 Ensure data integrity, accuracy, and security across all data science activities.
 Promote a data-driven culture within the organization.

Name of Position - Data Warehouse Operation

Translating business requirements into SQL/PL-SQL queries as well as developing Qlik sense reports
 Develop and optimize SQL/PL-SQL/Impala/Hive queries
 Should have prior Knowledge of working on Impala/ Hive
 Ensure queries are efficient, less resource intensive and adhere to following best practices of data processing domain
 Customize existing report based on business requirement, performance improvement and ease in usability
 Implement robust data validation and quality assurance processes to ensure the accuracy and reliability of data
 Identifying error in data and Reporting Incidents
 Designing, Developing and maintaining Qlik Sense Reports/ Dashboards

Name of Position - .Net Developer

Design, Development, Testing, implementation and Maintenance of .NET application.
 Development/maintenance of database (SQL server, Oracle/My SQL).
 Design client side and server -side architecture.
 Familiar with designing and implementation of web, mobile and cloud-based application.
 Understand Business requirement and transform requirement into functional application in line with business objective
 Optimization of application software and data base.
 API development and integration.
 Rewrite /making changes in existing application/code structure to increase efficiency and performance.
 Test, monitor and make better solution through incremental updates/features/app optimization.
 Create architecture, specification and user interface of application.
 Implement best practices and methodologies for securities, quality and development approach.

Name of Position - IT Engineer

Manage existing Servers, Hardware, Network infrastructure
 Support related to Existing application used for Regulatory submission.
 Comply to IS Audit / VAPT and other compliance initiatives taken by Bank.

Assisting in business process reengineering initiatives.

Support planning, execution, and monitoring of strategic projects.

Debugging, Testing and Documentation of the existing Applications

Coordinate meetings and communications with stakeholders to track progress and resolve issues.

Assist in the analysis of process performance and identification of improvement opportunities.

Name of Position - DQ Analyst

Evaluate and analyze data for accuracy, completeness, and consistency.

Identify data quality issues and take up with the concerned stakeholders to ensure that Bank's data is accurate, consistent, and reliable.

Develop and implement data quality standard, policies and procedures.

Utilize AI/ML tools to automate data quality checks, Data profiling and anomaly detection

Monitor and report on data quality metrics, identifying trends and areas for improvement.

Ensure the accuracy and reliability of data presented in the dashboards.

Collaborate with Business Stake Holders to resolve data quality issues

Conduct root cause analysis of data quality issues and recommend corrective actions.

Design and execute data quality audits and validation processes.

Create and maintain comprehensive documentation for data quality process and AI/ML Models.

Stay updated on industry best practices and emerging trends in Data Quality and AI/ML technologies.

Creating suitable checks in source systems effecting Data Quality.

Name of Position - Data Profiling

Translating business requirements into SQL/PL-SQL queries as well as developing Qlik sense reports

Develop and optimize SQL/PL-SQL/Impala/Hive queries

Should have prior Knowledge of working on Impala/ Hive

Ensure queries are efficient, less resource intensive and adhere to following best practices of data processing domain

Customize existing report based on business requirement, performance improvement and ease in usability

Implement robust data validation and quality assurance processes to ensure the accuracy and reliability of data

Identifying error in data and Reporting Incidents

Designing, Developing and maintaining Qlik Sense Reports/ Dashboards

Name of Position - Manager - Automation & Maintenance of Regulatory Returns

Design and Develop automated workflows for Regulatory Return process.

Translating business requirements into SQL/PL-SQL queries as well as developing Qlik sense reports

Develop and optimize SQL/PL-SQL/Impala/Hive queries

Daily Maintenance of existing process and Data Loading to target reporting tables as per defined frequency of each return.

Monitoring and maintaining Data Loading process and ensure submission of correct data to the regulatory authorities.

Ensure the accuracy and reliability of data presented in each return.

Collaborate with Business Stakeholders to understand new requirements or modification of any existing Return prescribed by Regulatory Authorities.

Recommend and implement process enhancements for increased efficiency and accuracy.

Troubleshoot and resolve issues related to Query Building and Automation Process.

Document automation processes, workflows and configuration and development of reconciliation report accordingly.

Name of Position - Senior Manager - Information Security Officer

Conducting audits and assessments of various products and processes to identify Data protection vulnerabilities and recommend mitigating tools and solutions.

Ensuring compliance of Digital Personal Data Protection Act provisions, Regulatory guidelines and adherence to Bank's Information security guidelines both at a technical and functional level.

Collaborate and Work closely with IT and business units to establish and enforce data protection initiatives and best practices.

Monitor and report on the implementation and effectiveness of data protection controls.

Review various products, processes, applications, solutions and tools to ensure Data Privacy compliance across all business functions

Knowledge of various solutions namely Information Rights Management and Mobile Device Management

Evaluate and manage the security practices of third-party vendors and service providers. Ensure third-party agreements include appropriate security provisions and compliance requirements.

Proven ability to manage all operations, maintenance and functions of the Security Policy, within the environment.

Develop and maintain incident response plans, playbooks, and procedures.

Coordinate with internal and external stakeholders to manage and communicate the response to security incidents.

Develop, Implement and monitor a strategic, comprehensive enterprise information security program to ensure the integrity, confidentiality and availability of data.

Establish a process for and monitor actual compliance of policies and with applicable laws and regulations.

Name of Position - Manager - Master Data Management & Metadata

Collaborate with Business and Technical Team to gather requirements and define MDM strategies and policies.
Perform Data Quality checks and implement data validation rules.
Develop and enforce data standards, Governance and Data Quality Framework.
Perform data profiling, cleansing and enrichment to maintain high data quality.
Manage data integration processes and workflows and Monitor and troubleshoot MDM systems to ensure optimal performance and resolve issues.

Creating and Maintaining existing Metadata repository and Data Dictionary to support data discovery, data lineage and data cataloguing and modification in Business/Technical logic consultation with all stakeholders.

Conduct Metadata audits and quality assessment to identify report and resolve issues.

Provide support to business units for master data-related issues.

Assist in training staff on data management best practices

Metadata Repository Maintenance

Ensure the metadata repository is up-to-date and accurate

ANNEXURE II

GUIDELINES FOR UPLOADING THE PHOTOGRAPH, SIGNATURE & OTHER DOCUMENTS

The following documents are required to be uploaded by the candidate:

- Resume (PDF)
- DOB Proof: 10th marksheet/ certificate (PDF)
- Educational Certificates: Relevant Mark-Sheets/Certificate (PDF) (All Educational Certificates should be scanned in a single PDF file)
- Work experience certificates (PDF) if applicable (PDF)
- Caste/ Category Certificate (PDF) if applicable (PDF)
- PWD certificate, if applicable (PDF)

Before applying online, a candidate will be required to have scanned (digital) image of the above documents as per the specifications given below:-

- All Documents must be in PDF format.
- Page size of the document to be A4.
- Size of the file should not be exceeding 500 KB.
- In case of Document being scanned, please ensure it is saved as PDF and size not more than 500 KB as PDF. If the size of the file is more than 500KB, then adjust the setting of the scanner such as the DPI resolution, no. of colors etc., during the process of scanning. Please ensure that Documents uploaded are clear and readable.

GUIDELINES FOR SCANNING THE PHOTOGRAPH (4.5cmX3.5cm) & SIGNATURE:

Before applying online, a candidate will be required to have a scanned (digital) image of his/ her photograph and signature as per the specifications given below:-

(i) Photograph Image :-

- Photograph must be a recent passport style colour picture.
- Make sure that the picture is in colour, taken against a light coloured, preferably white background.
- Look straight at the camera with a relaxed face.
- If the picture is taken on a sunny day, have the sun behind you, or place yourself in the shade, so that you are not squinting and there are no harsh shadows.
- If you have to use flash, ensure there's no "red-eye".
- If you wear glasses make sure that there are no reflections and your eyes can be clearly seen.
- Caps, hats and dark glasses are not acceptable, religious headwear is allowed but it must not cover your face.
- Dimensions 200 x 230 pixels (preferred)
- Size of the file should be between 20kb – 50kb.
- Ensure that the size of the scanned image is not more than 50kb. If the size of the file is more than 50kb, then adjust the settings of the scanner such as the DPI resolution, no of colours etc during the process of scanning.

(ii) Signature Imaging :-

- The applicant has to sign on white paper with Black Ink Pen.
- The signature must be signed only by the applicant and not by any other person.
- The signature will be used to put on the Call letter and wherever necessary.
- If the applicant's signature on the answer script at the time of the examination does not match the signature on the Call letter, the applicant will be disqualified.
- Dimensions 140 x 60 pixels (preferred)
- Size of the file should be between 10kb – 20kb.
- Ensure that the size of the scanned image is not more than 20kb.
- **Signature in CAPITAL LETTERS shall NOT be accepted**

(iii) Guidelines for scanning of photograph, signature & documents :-

1. Set the scanner resolution to a minimum of 200 dpi (dots per inch).
2. Set the colour to True Colour
3. Crop the image in the scanner to the edge of the photograph/ signature, then use the upload editor to crop the image to the final size (as specified above).
4. The image file should be JPG or JPEG format. An example file name is: image01.jpg or image01.jpeg. Image dimensions can be checked by listing the folder files or moving the mouse over the file image icon.
5. Image dimensions can be checked by listing the folder/ files or moving the mouse over the file image icon.
6. Candidates using MSWindows/ MSOffice can easily obtain photo and signature in .jpeg format not exceeding 50kb and 20kb respectively by using MSPaint or MSOffice Picture Manager. Scanned photograph and signature in any format can be saved in .jpg format by using 'Save As' option in the File menu and size can be reduced below 50kb (photograph) & 20kb (signature) by using crop and then resize option (Please see point (i) & (ii) above for the pixel size) in the 'Image' menu. Similar options are available in other photo editor also.
7. If the file size and format are not as prescribed, an error message will be displayed.

8. While filling in the Online Application Form, the candidate will be provided with a link to upload his photograph and signature.

PROCEDURE FOR UPLOADING THE PHOTOGRAPH, SIGNATURE & DOCUMENTS :-
